

# ***FlowCon CA Prop65 Compliance Declaration***

March 2026

FlowCon International ApS, hereinafter referred to as FlowCon, is supplier of HVAC valves, inserts and accessories. This General Statement covers all products manufactured by FlowCon. If a product specific (by part number) declaration is required, please contact FlowCon.

CA PROP65 (California Proposition 65, officially the Safe Drinking Water and Toxic Enforcement Act of 1986) is the California chemical substances regulatory framework.

CA PROP65 does not prohibit sales of products containing hazardous substances at any level. It merely requires that if listed chemical substances are present at recognized risk levels that this is informed.

With this General Statement, we declare that, to the best of our knowledge, all products manufactured and supplied by FlowCon do not contain substances listed on the proposition list except lead which is used in brass alloys.

The lead content is between 2.0-3.0% of any brass used in valve housings, head nuts, p/t plugs, flushing caps etc. In addition a DZR brass alloy is available; this dezincification-resistant brass alloy also incl. 0.02-0.15% Arsenic. These brass products are not sold for use with drinking water or potable water.

If you have any questions, please do not hesitate to contact FlowCon.

Authorized and on behalf of FlowCon International ApS,

A handwritten signature in blue ink, appearing to read 'Thomas Vendt'.
