

Radisson Blu Hotel Yerevan, Armenia

5-star hilltop hotel in Yerevan with stunning city and mountain views.

The Radisson Blu Hotel Yerevan is located near Victory Park and Areni Lake and offers beautiful views of Yerevan city center with Mount Ararat in the background. The facilities create a resort-like feel close to many local businesses and embassies. You can explore nearby attractions like the Cascade Complex and the Charles Aznavour House Museum, both within walking distance of our family-friendly hotel. Convenient bus and train services are also available nearby.

The hotel features 142 rooms and 19 suites, stylishly housed within the stone and glass building. Each room offers great views, and the two on-site restaurants have lovely outdoor dining areas to enjoy the scenery. Other facilities include two on-site bars, laundry services, and a spa and fitness center with a pool as well as six meeting rooms, perfect for business or social gatherings of up to 200 people.

Application

In the mid 2010's, dynamic balancing valves were sold and delivered as FlowCon Composite valves to the hotel. With the ambition of upgrading the installation, the customer has now exchanged the valve inserts and made an easy switch to FlowCon

E-JUST. E-JUST offers a stepless setting with 41 unique settings in each insert – next to this setting is done externally and can be adjusted while the system is in operation.

The dynamic flow limiters are used as zone valves next to already installed 3-way valve. The project originally included FCUs with only 3-way valves installed from the factory. Consequently, only static control was available. For the last almost 10 years FlowCon Composite has done the dynamic balancing work and now future dynamic balancing will be done with FlowCon E-JUST.

Project Configuration:

Project name:

Radisson Blu Hotel Yerevan

Project management:

Radisson Blu

Contractor:

Demo Dreams

Valve type and model:

Dynamic balancing, FlowCon E-JUST.1.G.B

Application:

Refurbishment
