

## Vardanants Medical Center, Yerevan, Armenia

### New center for innovative medicine.

The Vardanants Center for Innovative Medicine offers a comprehensive range of medical services designed to meet diverse healthcare needs. The center features a Day Hospital for effective treatments without the need for overnight stays, and a Mammalogy Department where patients can undergo complete breast examinations in a single visit. Advanced diagnostic services include CT scans using the latest technology, ensuring minimal side effects. The center also provides extensive pediatric care, with both outpatient services and home visits available. Additionally, Vardanants offers specialized departments for gynecology, cardiology, endocrinology, and more, all aimed at delivering high-quality, modern medical care.

The medical center was founded in 2005 with the aim of providing high-quality services guaranteed by a health insurance policy. During 2024 the hospital was expanded. Today, the center serves more than 55,000 patients annually - about 350 per day.

### Application

FlowCon was selected to supply PICV valves to the project. FlowCon Green was the chosen solution with its external adjustable flow setting and built-in pressure independent flow control. And with the matching actuator, full authority is provided from selected max. flow down to zero flow requirement.
