

Yandex Armenia, Yerevan, Armenia

IT specialists gathered under one roof.

Yandex Armenia opened a new office in Yerevan in May 2024. The office is designed for more than 450 people and will employ highly qualified IT specialists including developers, designers and managers who shall develop Yandex technologies for Armenia and abroad. The office building is located in the heart of the city in an area known to hold companies within IT services. For Yandex Armenia, services are divided into 5 business areas: Backend, Machine Learning, Product- and Project Management, People Management and NewBiz. Key employees will be curated in cooperation with the local companies YerevaNN, Armenian Code Academy, Product People, and LIT Academy which breeding partnerships.

'Armenia is among the top 3 of our international presences in terms of the number of launched services. A large office will help create new jobs and develop the company's services in the Armenian market' says Aram Mkhitarian, head of Yandex Armenia.

Application

For this project, FlowCon has supplied pressure independent control valves (PICV), FlowCon Green. FlowCon Green was the chosen solution with its external adjustable flow setting and 100% authority at any flow setting – a solution easy to work with.
